

DOD TECHNOLOGIES

The Leader in Low Level Toxic Gas Monitoring

The XA-4400 personal four-gas detector is a wearable hazardous gas detector. It is worn within the breathing zone to detect four of the most common industrial gas hazards, keeping you safe within your working environment. When worker exposure exceeds pre-set limits the device's audible, vibrating, and flashing LED alarms alert you to the gases present. Readings are displayed on its bright, backlit LCD display with selectable data logging included with the optional data kit.

The durable sensors will last for 24 months. The unit can operate for over 40 hours continuously with a single AAA battery. Complies with hydrogen and acetylene explosion proof requirements.

ITEM # | PERSONAL FOUR XA-4000 | GAS DETECTOR

COMUSTIBLE

LEL

0-100% LEL

OXYGEN

O₂

0-25% Vol.

HYDROGEN SULFIDE

H₂S

0-30 PPM

CARBON MONOXIDE

CO

0-300 PPM

REALIBILITY & SUPPORT

DOD Technologies is the leader in low level gas detection. We understand the value of your production, and we know that false alarms can cost millions of dollars in lost productivity. That's why we've partnered with other high-quality manufacturers to offer a product line with an enhanced standard of accuracy and reliability. We have a worldwide network of service engineers who are knowledgeable and passionate about gas detection. Our portfolio includes fixed systems, portable gas detectors, controllers, systems integration and onsite field services.
